

SupaPowa® Pebble | Teardrop

Product Description

The Teardrop receiver complements mobile devices that are not yet wireless power ready. Its double-sided feature supports connection to either Micro-USB or Lightning connectors (For earlier iPhone® models, a 30 pin adaptor is available upon request, which simply plugs onto the Micro USB connector), enabling you to charge your mobile device face up no matter which way your connector is located. Simple, useful power.

Product Specification
